

Item No	Software Version	Date	Description Of Change
1	Wj.00.05 (02/09/04)		Fix the power-saving bug with high electric current.
2	Wj.00.05 (02/09/04)		Make aic22 initial when the phone restart in order to avoid aic wasting electric current.
3	Wj.00.05 (02/09/04)		Fix the bug of reset constantly.
4.	Wj.00.06 (02/17/04)	02/09/04	When add and edit phonebook, user can input character in phone-number mode.
5.	Wj.00.06 (02/17/04)	02/10/04	Fixed when incoming SDP with more than 6 payload type then our SIP Phone response 400(Bad Request). So we changed max support payload type from 6 to 12.
6.	Wj.00.06 (02/17/04)	02/10/04	For all project, let phone can recieve the signal of 183,and for Net2Phone, make piov user be able to change outbound proxy,and
7.	Wj.00.06 (02/17/04)	02/10/04	Fixed coding error. We don't change domain name of req-url in a dialog. Beacuse this req-url would be changed by response record-route and contact
8.	Wj.00.06 (02/17/04)	02/10/04	Let user-agent read the GG_TITLE_IN_HTTP of projectconfig.h.
9.	Wj.00.06 (02/17/04)	02/11/04	Modify atpm dial function,that can compare atpm data correctly.
10.	Wj.00.06 (02/17/04)	02/11/04	Fix battery discharge all the electricity while system repeat rebooting caused by watchdog.
11.	Wj.00.06 (02/17/04)	02/10/04	Fixed coding error. We don't change domain name of req-url in a dialog. Beacuse this req-url would be changed by response record-route and contact
12.	Wj.00.06 (02/17/04)	02/17/04	Fix some bug of display in P2000W.
13.	Wj.00.07 (02/27/04)	02/23/04	Implemented auto shut down when battery is less 3.4V in boot code. It's fixed user parameters is be destoryed at auto reboot while critical voltage. Rewrited read H/W version from hardware monitor's GOIP pin. That is convert 4 GPIO pin to a integer value
14.	Wj.00.07 (02/27/04)	02/18/04	Fixed the bug that press key fastly maybe lose DTMF INFO , because some server resonse "OK" slow
15.	Wj.00.07 (02/27/04)	02/24/04	Fixed send Register package to both outbound proxy server and Sip proxy server
16.	Wj.00.07 (02/27/04)	02/24/04	Fixed when press power button to turn on system while battery is critical low then wait 3sec auto turn off.. But if press power button more than 3sec then can't turn off system forever until remove battery.

17.	Wj.00.07 (02/27/04)	02/24/04	INVITE for 407, the requested URL is wrong - fix ACK and INVITE req-url after receiving the 407 response.
18.	Wj.00.07 (02/27/04)	02/27/04	Fixed can't easy to get IP address by DHCP when use CISCO AP.
19.	Wj.00.07 (02/27/04)	02/27/04	Fixed expire time default value to 300 for Zyxel.
20.	Wj.00.07_t.01 (02/27/04) ' Base on wb0036 brown Wb0037 '	02/27/04	Allow phone book to add '+' sign by web and menu. Note: This function allow for release in Wj.00.09.
21.	Wj.00.08 (02/27/04) ' Base on wb0036 brown Wb0037 '	03/03/04	Fix DS field setting implemented vaule get from flash.
22.	Wj.00.08 (02/27/04) ' Base on wb0036 brown Wb0037 '	03/03/04	Remove the item of Speed dial and Group setting.
23.	Wj.00.0a	03/10/04	Allow phone book to add '+' sign by web and menu. Note: Before not add this function in WiFi platform.
24.	Wj.00.0a	03/11/04	Allow phone book to add '+' sign by web and menu. Note: That are support on user account's phone number.
25.	Wj.00.0a	03/11/04	Different wireless channel for International Zone in UI by wireless driver.
26.	Wj.00.0a	03/16/04	Allow P2000W's MMI to dial plus sign and fix the "%2B" bug of name and phone number by web browser.
27.	Wj.00.0a	03/23/04	Fixed except numeral another sign can't be showed that local user phone number on sip protocol. Example:"From:NULL<sip:'+'500@192.168.0.55;user=phone>;tag=....."
28.	Wj.00.0a	03/19/04	When user terminates a call with 183 Session before Caller answers, change BYE request to CANCEL request .
29.	Wj.00.0a	03/24/04	Fixed the dtmf relay type & dtmf payload value to set once that all prof change.
30.	Wj.00.0a	03/24/04	Fixed wrong PT of RFC2833 payload.
31.	Wj.00.0a	03/12/04	Fixed parse from and to message error ,When their format is not "<sip:.....>;tag=.....".
32.	Wj.00.0a	03/24/04	Don't check the local Tag befor Dialog be created.

33.	Wj.00.0a	03/24/04	Added parsing flag and lr parameters.
34.	Wj.00.0a	03/24/04	Changed INVITE retry time from 6 to 3.
35.	Wj.00.0a	03/24/04	Fixed handle record rout error in UAS behavior.
36.	Wj.00.0b	05/14/04	It can parse from and to header field port & fixed format.
37.	Wj.00.0b	05/14/04	Modify WLAN ssid length can support 32.
38.	Wj.00.0b	05/14/04	Update Session Timer Function for ZyXEL
39.	Wj.00.0b	05/14/04	Added STUN support.
40.	Wj.00.0b	05/21/04	Fix return value not match function call by Wireless Rate.
41.	Wj.00.0b_t04	05/05/04	Implement STUN.
42.	Wj.00.0b_t04	05/13/04	Added 3 item for STUN function.
43.	Wj.00.0b_t04	05/14/04	Added STUN support.
44.	Wj.00.0b_t04	05/28/04	Added 4 parameters for STUN function.
45.	Wj.00.0b_t04	11/24/03	Added Session Timer function. It does depend on switch SIP_SESSION_EXPIRE.
46.	Wj.00.0b_t04	11/28/03	Added Session Timer function. It's depends on switch SIP_SESSION_EXPIRE.
47.	Wj.00.0b_t04	05/14/04	Update Session Timer Function
48.	Wj.00.0b_t05 Catch and Release 06/04/04	05/24/04	Modify ssid length can support 32.(Fix can input 32 chars but show have only 30 chars)
49.	Wj.00.0b_t05	05/24/04	Modify vibrate and ring mode. (Fix first ring tone too loud)
50.	Wj.00.0b_t05	06/04/04	Fix Missed Call will display if missed call is exist after boot up.
51.	Wj.00.0b_t05	06/04/04	Modify the function "Input method". (Fix in MMI, when input over first row that can't change input method mode and in char mode if press value '1' which all of char was disappear)
52.	Wj.00.0C	06/04/04	Fixed coding error. Cause WEB can't show WEP key correctly.
53.	Wj.00.0C	06/07/04	Fine tune ring method, increase gain fast.
54.	Wj.00.0C	06/07/04	Remove the item of "mute" in editing ring_vol.
55.	Wj.00.0c-T06	06/25/04	No ring back tone when call out to PSTN
56.	Wj.00.0c-T06	06/25/04	In SIP protocol state:' FROM 'have garbage values.
57.	Wj.00.0c-T06	06/25/04	Password be '****' changed when not modify it.
58.	Wj.00.0c-T06	06/25/04	TFTP firmware update in APP.
59.	Wj.00.0c-T06	06/25/04	Key defines: *=>'.' #==>':'. .
60.	Wj.00.0c-T06	06/25/04	Display name support space key (SIP caller ID).

61.	Wj.00.0c-T06	06/25/04	SIP outbound input characters length support 32 bytes.
62.	Wj.00.0c-T06	06/25/04	STUN default IP default value follow Proxy server setting.
63.	Wj.00.0c-T06	06/25/04	ESSID input characters support space key.
64.	Wj.00.0c-T06	06/25/04	WEP by ASCII.
65.	Wj.00.0c-T07	06/25/04	Fix enable SESSION TIMER can't use nikotel sever.
66.	Wj.00.0c-T08	06/29/04	Fix error default value on STUN
67.	Wj.00.0c-T08	06/29/04	Fix SESSION TIMER close but phone continue send each second.
68.	Wj.00.0d	06/25/04	No ring back tone when call out to PSTN
69.	Wj.00.0d	06/25/04	In SIP protocol state:' FROM 'have garbage values.
70.	Wj.00.0d	06/25/04	Password be '****' changed when not modify it.
71.	Wj.00.0d	06/25/04	TFTP firmware update in APP.
72.	Wj.00.0d	06/25/04	Key defines: *=>'.' #==>'.'.
73.	Wj.00.0d	06/25/04	Display name support space key (SIP caller ID).
74.	Wj.00.0d	06/25/04	SIP outbound input characters length support 32 bytes.
75.	Wj.00.0d	06/25/04	STUN default IP default value follow Proxy server setting.
76.	Wj.00.0d	06/25/04	ESSID input characters support space key.
77.	Wj.00.0d	06/25/04	WEP by ASCII.
78.	Wj.00.0d	06/25/04	Fix enable SESSION TIMER can't use nikotel sever.
79.	Wj.00.0d	06/29/04	Fix error default value on STUN
80.	Wj.00.0d	06/29/04	Fix SESSION TIMER close but phone continue send each second.
81.	Wj.00.0e	07/01/04	Modify default values about STUN Server , Outbound Proxy IP, SIP URI, TFTP Server IP
